

AURORA & ECHELON WIND DEFLECTOR

INSTALLER: Leave these instructions with consumer.
CONSUMER: Retain for future reference.

Your wind deflector allows for proper performance of your grill when subjected to windy conditions.

Align the wind deflector on the rear of the oven lid (see Fig. 1-1), centering it from left to right. It is important that the wind deflector is installed centered, so as to clear the rotisserie brackets when the oven lid is opened (see Fig. 1-2). Carefully slide the the wind deflector brackets onto the oven lid, until the bracket tabs lock the deflector in place.

Note: The wind deflector is designed for permanent installation.
